

Yodle, New York, NY

Location : Yodle, NY

Architect: HLW International LLP

Scope: Bi-fold Glass Walls, Swing Doors, Fixed Panels

aimed to create an environment that combined openness and community with spaces tailored for focused work. [PK30 System](#) played an essential role in bringing this vision to life by providing cutting-edge glass partitions, [swing doors](#), and operable wall systems that seamlessly integrated style and functionality.

Challenge

Yodle's dynamic business model demanded a workspace that could balance aesthetics with flexibility and accessibility.

The design needed to achieve:

- An open, collaborative environment that maintained visual connectivity throughout.
- A seamless and welcoming main entrance without floor tracks, ensuring accessibility and an uninterrupted design flow.
- Durable and adaptable materials capable of withstanding daily use in a high-traffic environment.

Each element of the project had to align with Yodle's innovative culture and brand identity, while meeting strict functional requirements.

Solutions

[PK30 System](#) partnered with HLW International to develop a customized solution tailored to Yodle's needs:

- **Main Entrance:** A six-panel bi-fold operable wall system featuring sleek, minimalist aluminum frames and glass panels. This system provided a trackless solution, delivering both visual impact and accessibility.
- **Glass Partitions:** Eight fixed glass panels and an ADA-compliant swing door created clear divisions while maintaining a sense of openness and natural light flow.
- **Design Features:** Satin black anodized aluminum frames paired with polished

glass surfaces offered a sophisticated and contemporary aesthetic, perfectly complementing Yodle's brand.

PK30's systems ensured flexibility, durability, and a modern edge that aligned with the project's overall design goals.

Results

[PK30's](#) high-performance door and panel systems exceeded expectations by:

- **Enhancing Collaboration:** Open sightlines and seamless transitions fostered a more connected and innovative workspace.
- **Achieving ADA Compliance:** The ADA-compliant swing door ensured inclusivity and accessibility for all team members and visitors.
- **Delivering Durability:** PK30's premium materials provided long-lasting performance, essential for a bustling office environment.
- **Elevating Aesthetics:** The combination of glass and aluminum created a clean, contemporary design that reflects Yodle's forward-thinking identity.

The result is a workspace that perfectly balances form and function, creating an environment where collaboration and creativity thrive.

Conclusion

Yodle's New York City office demonstrates the transformative impact of [PK30 Systems'](#) innovative glass solutions. By seamlessly integrating design, accessibility, and performance, [PK30](#) helped create a workspace that inspires productivity and reflects the values of a cutting-edge tech company. This project highlights [PK30's](#) commitment to delivering custom solutions that redefine modern commercial spaces.
